Professional Summary

AI/ML professional and full stack developer with hands-on experience in Python, machine learning, CNNs, computer vision, RAG, and agentic AI workflows. Published research covers medical imaging, explainable AI, and machine learning applications, supported by experience with model development, evaluation, data analysis, and visualization. Brings strong analytical thinking, adaptability, and a collaborative growth mindset to applied data science projects.

PROJECTS

PROTOTYPE PANDEMIC DEFENSE SYSTEM: CNN-POWERED MEDICAL IMAGING FOR DISEASE PREDICTION 2025

Springer – International Conference on Data Science

- Co-authored a research paper applying Convolutional Neural Networks (CNNs) to classify medical images associated with diseases such as COVID-19 and cancer.
- Contributed to the design of an AI-powered prototype intended to support early diagnosis and healthcare response systems.
- Assisted with machine learning model evaluation, research analysis, and publication development.

HARVESTING INSIGHTS: LEVERAGING EXPLAINABLE AI TO OPTIMIZE FARMING PRACTICES 2024

IEEE Conference on Advances in Computing

- Co-authored research applying Explainable AI (XAI) to improve agricultural productivity and support operational decision-making.
- Analyzed agricultural datasets to improve the transparency and interpretability of AI-driven farming recommendations.
- Supported research methodology, analysis, and manuscript preparation; cited in multiple academic works.

ANXIETY PREDICTION & ANALYSIS -A MACHINE LEARNING BASED APPROACH 2023

IEEE 4th International Conference

- Co-authored a machine learning research paper focused on predicting anxiety disorders to support early detection and mental health intervention.
- Analyzed psychological datasets to identify patterns affecting emotional and physical well-being.
- Contributed to paper writing and editing

Feedback System Based on Facial Emotion Recognition

- Developed an emotion-aware system using OpenCV and CNN-based image classification to detect and analyze facial expressions in real time, enhancing user feedback experiences.

Main Host of Deep Dive Data

Chandigarh University, India

- Led and hosted a large-scale academic event centered on data science and emerging technologies, showcasing strong leadership and public speaking abilities.

RAG-Based Finance Report Generator

- Built a Retrieval-Augmented Generation pipeline that retrieves and indexes historical financial crash data and market events using semantic/vector-based similarity search, then generates automated reports highlighting key risk factors and similarity indexes between current and past events.

Publications

- PROTOTYPE PANDEMIC DEFENSE SYSTEM: CNN-POWERED MEDICAL IMAGING FOR DISEASE PREDICTION. *Springer – International Conference on Data Science*
- HARVESTING INSIGHTS: LEVERAGING EXPLAINABLE AI TO OPTIMIZE FARMING PRACTICES. *IEEE Conference on Advances in Computing*
- ANXIETY PREDICTION & ANALYSIS -A MACHINE LEARNING BASED APPROACH. *IEEE 4th International Conference*

EDUCATION

Birla Institute of Technology & Science (BITS) 2025 - 2027
Master of Engineering, Software Systems (GPA: 8.53 SGPA) Dubai, UAE

Chandigarh University 2021 - 2025
Bachelor of Engineering, Computer Science and Engineering, Artificial Intelligence and Machine Learning Punjab, India
(CGPA:7.81)

Skills

Programming: Python, DSA, ML, AI, CNN, Supervised Learning, C++, C#, HTML, CSS, JavaScript, SQL

AI/ML Engineering: RAG, Vector Databases & Semantic Search, LLM Orchestration, Prompt Engineering, Agentic Workflows, Computer Vision (OpenCV, Object Detection, Image Classification), Scikit-learn, PyTorch, TensorFlow

Data Visualization & Tool & Platforms: Power BI, Matplotlib, Seaborn, Jupyter Notebook, GitHub, Google Colab, Jupyter Lab, Spyder, VS Code, Unity, Data Mining

Soft Skills: Business Research & Reporting, Strategic Thinking & Visioning, Analytical & Critical Thinking, Problem Solving & Decision Making, Adaptability & Learning Agility
